

AT-AR415S

Secure Modular Router

AT-AR415S

- 1 x 10/100BASE-T WAN port
- 4 x 10/100BASE-T LAN ports
- 1 x asynchronous port
- 1 x PIC bay
- Integrated Security Engine

The AT-AR415S is a secure modular router offering performance, flexibility and security for small to medium-sized business. Packaged in a compact one-rack unit chassis, this versatile router provides five 10/100 Fast Ethernet interfaces and supports a variety of Port Interface Cards (PICs).

For the WAN network, the AT-AR415S features one 10/100Mbps Ethernet Port. Also offered is an asynchronous port, and four Layer 2 switched LAN ports—any of which can also be reconfigured as a DMZ.

Simple Plug-in flexibility

A range of different PICs can be plugged into the PIC bay, including high speed E1/T1, V35/V21 sync and BRI/PRI ISDN, allowing a high degree of flexibility and a wide choice of WAN connectivity. The onboard management/async port can be used for local management or for connection to an external modem.

Security

Allied Telesis' high performance Stateful Inspection Firewall significantly enhances the overall security of business critical information. The AT-AR415S delivers up to 100 Mbps of firewall throughput, and on board hardware encryption offers DES, 3DES and AES (Advanced Encryption Standard) hardware encryption, that uses up to 256 bit key code.

The AT-AR415S also has integrated hardware Virtual Private Network (VPN) acceleration delivering up to 95 Mbps of 3DES VPN + NAT and firewall throughput and up to 80 Mbps of AES-256 VPN + NAT and firewall throughput¹.

AES-Encrypted VPN

The AT-AR415S secure modular router supports the Advanced Encryption Standard (AES). AES is a Federal Information Processing Standard (FIPS 197) that specifies a cryptographic algorithm for use by U.S. Government organizations to protect sensitive, unclassified information.

VPN IPsec

IPsec (Internet Protocol Security) is a set of protocols for security at the network or packet processing layer. Early approaches to security were performed at the application layer of the communications model. IPsec is critical for secure virtual private networks and for remote user access through dial-up connections to private networks.

802.1Q VLAN

The AT-AR415S security router is 802.1Q compliant. This enables the user to configure up to 64 VLANs with VLAN Identifier numbers (VID) between one and 4,094.

The 802.1Q specification establishes a standard method for inserting VLAN membership information into Ethernet frames. VLANs can span many switches. VLANs between switches are achieved by inserting a tag with a VID between one and 4,094 into each frame. A VID must be assigned for each VLAN. By assigning the same VID to VLANs on many switches, one or more VLANs (broadcast domains) can be extended across a large network.

The AT-AR415S can firewall between VLANs thus providing protection within the network from internal attacks.

¹ Performance numbers subject to change.

² Additional licensing required.

Key Features

- 1 PIC bay supporting a range of WAN connections
- 1 Ethernet 10/100Mbps WAN port
- 4 Ethernet 10/100Mbps LAN ports
- 1 Async port (RJ45)
- Stateful Inspection Firewall
- AES, 3DES, DES hardware based encryption
- MD5 / SHA
- Up to 50 VPN tunnels²
- L2TP
- Supports Windows XP, 2000 VPN clients that use pre-shared keys and X509 Certificates
- PPPoE
- Protection against Denial of Service attacks
- SSH / SSL
- 802.1x
- SMTP and HTTP proxy
- RADIUS / TACAS+ look-up
- PAP / CHAP user authentication
- RoHS compliant

AT-AR415S | Secure Modular Router

Firewall

Allied Telesis' high performance Stateful Inspection Firewall provides a high level of security by supplying full application-layer awareness without breaking the client/server model.

Allied Telesis' Stateful Inspection Firewall:

- Offers per packet dynamic access control (Stateful Inspection) for all traffic reaching the firewall
- Protects against a wide range of Denial of Service (DOS) attacks, including Ping of Death, Smurf attacks, port scans, fragment attacks and IP Spoofing
- Sends automatic email alerts to initiate appropriate action

Software Quality of Service

The AlliedWare™ operating system provides advanced Quality of Service (QoS) and traffic shaping features. There are five key QoS features available on the AT-AR415S:

- Bandwidth Metering
- RED Curves
- Mixed Scheduling
- Virtual Bandwidth
- Dynamic Application Recognition (DAR)

Software QoS also supports eight queues per interface. DAR is used to snoop for session setup exchanges and dynamically create classifiers that match the voice and video packets in the session. For more information, see the Allied Telesis Advanced QoS White Paper available on our website.

Triggered Events and Scripts

A trigger sets off an ordered sequence of scripts and router commands to be executed when a certain event occurs. This is a powerful mechanism for automating the execution of router commands in response to specific events. Each trigger may reference multiple scripts and any script can be used by any trigger. Using this feature, the AT-AR415S can, for example, send an email alert to the network manager when trouble occurs, or can automatically shut down an interface to protect against suspected attacks.

The scripting facility enables sequences of commands to be stored in a script and replayed at any time, allowing the AT-AR415S to be easily configured or quickly re-configured. This is useful when developing a complex configuration, making the same configuration change to several different routers, Layer 3 switches or security appliances, or introducing a configuration change that must occur at a particular time. Scripts can be created on a PC

and uploaded to the router, or they can be created using the router's own integrated text editor. They can be activated either from the command line or from a trigger.

World Class Operating System

The AT-AR415S is shipped 'ready to run' with AlliedWare, a comprehensive software suite that includes all the features, management capabilities and performance that today's networks demand.

AlliedWare is Allied Telesis' feature rich operating system (OS) that serves as the foundation for its entire line of Layer 3 routers and switches. Robust and reliable, the AlliedWare OS offers a breadth of functionality for any application.

AlliedWare also delivers a high level of flexibility and investment protection. AlliedWare is a common OS, so the AT-AR415S secure modular router is able to interoperate seamlessly with other Allied Telesis security appliances and Layer 3 switches. As a standards-based implementation, AlliedWare also assures full interoperability with all other major network equipment vendors.

Feature licenses give access to a set of progressive features:

- The Advanced Layer 3 Upgrade provides a set of cutting edge protocols such as IPv6, BGP-4 and Server Load Balancing.
- The Firewall Licensing Upgrade can increase the concurrent firewall sessions from 2000 to 4000 or 8000.
- VPN Licensing Upgrades allow for the base unit with a single VPN tunnel to be upgraded to 5, 10, 25 or 50 concurrent users.

Graphical User Interface

The AT-AR415S' Graphical User Interface (GUI) allows for swift, pain free configuration and management.

The following major features are incorporated in the AT-AR415S GUI:

- Easy configuration for connection to the Internet
- PPP over Ethernet configuration and monitoring
- DHCP server configuration and monitoring
- Firewall configuration and monitoring, ability to view events, logs and device status
- IPsec configuration
- Site-to-site and Remote Access VPN wizards³

Hardware Features

- 1 x 10/100Mbps Ethernet WAN port
- 4 x 10/100Mbps Ethernet LAN ports
- 1 x asynchronous port (RJ45)
- 1 x PIC bay
- 802.1q tagged VLANs, with support for up to any 64 VLAN IDs of a possible 4094 (LAN ports only)
- Automatic MDI/MDI-X crossover with user override via software commands (LAN ports only)
- 266MHz CPU
- 32MB SDRAM
- 16MB of Flash memory enabling storage of 2 software releases
- On-board hardware security processor enabling the following advanced encryption function:
 - Complete processing of IPsec header and trailer
 - Support for 3DES, DES, DES-MAC, AES, SHA-1 and MD-5
 - PKI acceleration for Diffie-Hellman, RSA and DSA
 - D-H negotiation (with 1024-bit modulus, 180-bit exponent)
 - 1024-bit sign and verify RSA and DSA

Real Time Clock

The real time clock (RTC) keeps track of current date and time. During times when the system has been powered down, a backup battery supplies power to the RTC.

Port Interface Cards

AT-AR020	Single configurable E1/T1 interface that supports channelized/unchannelized Primary Rate ISDN/Frame Relay
AT-AR021S (V3) ⁴	Single Basic Rate ISDN (S/T) interface
AT-AR023	Single Synchronous port up to 2Mbps to an external CSU/DSU (AT-V.35-DTE-00 or AT-X.21-DTE-00 cable required)
AT-AR024	Four Asynchronous RS232 interfaces to 115Kbps
AT-AR027	Two VoIP FXS ports

³ Available in AlliedWare 2.9.1

⁴ AR021S (V3) requires AlliedWare® Operating System version 2.9.1-13 or later

Software Features

- Secure VPN option
- IPsec (AES, 3DES, DES, DES-MAC, MD5, SHA-1)
- Stateful Inspection Firewall
- Network Address Translation (NAT)
- CLI, PAP and CHAP
- RADIUS, TACACS
- PKI for IKE/IPsec
- SSL
- SecureShell remote management
- UPnP v1.0
- Generic Routing Encapsulation
- Dynamic IP address assignment
- L2TP (Layer 2 Tunneling Protocol)
- DHCP
- PPPoE
- IP packet filtering
- IP multihoming
- Demand IP and IPX
- IPX/SPX spoofing
- Spanning tree on Bridge Ports
- BAP/BACP (Bandwidth Allocation Protocol)
- PPP multilink
- Callback
- IP/IPX and bridge filtering
- Advanced routing protocols OSPF, BGP-4, RIP and RIPv2
- Multicast protocols DVMRP, PIM-SM, PIM-DM
- SNMP management v2c and SNMPv3
- GUI
- OSI
- Server Load Balancer
- IPv6
- IP, IPX routing
- RSVP
- VRRP
- IP Packet prioritization
- STAC data compression (s/w only)

Reliability

System MTBF:	90,000 hours min
PSU MTBF:	150,000 hours min
Base MTBF:	533,000 hours min

Power Characteristics

100 to 240vAC, 50 to 60Hz

Physical Dimensions

IU rack mount (with included kit),
Depth 190mm,
Width 305mm (440mm width with the
included rack mount kit fitted)
Weight 1.75 kg (3.75lbs)

Regulatory Approvals

EMC Emissions: EN55022 class A, FCC class A,
VCCI class A, AS/NZS CISPR22 class A
Immunity: EN55024
Safety: UL60950, CAN/CSA-C22.2NO. 60950-
00, EN60950
Listing: UL, cUL, TUV

Environmental Specifications

Operating temperature range:
0°C to 40°C (32°F to 104°F)
Storage temperature range:
-25°C to 70°C (-13°F to 158°F)
Relative humidity range:
5 to 95% non-condensing

Standards and Protocols Software Release 2.9.1

BGP-4

- RFC 1771 Border Gateway Protocol 4
- RFC 1966 BGP Route Reflection
- RFC 1997 BGP Communities Attribute
- RFC 1998 Multi-home Routing
- RFC 2385 Protection of BGP Sessions via the TCP MD5 Signature Option
- RFC 2439 BGP Route Flap Damping
- RFC 2858 Multiprotocol Extensions for BGP-4
- RFC 2918 Route Refresh Capability for BGP-4
- RFC 3065 Autonomous System Confederations for BGP
- RFC 3392 Capabilities Advertisement with BGP-4

Encryption

- RFC 1321 MD5
- RFC 2104 HMAC
- RFC 2451 The ESP CBC-Mode Cipher Algorithms
- FIPS 46-3 DES
- FIPS 46-3 3DES
- FIPS 180 SHA-1
- FIPS 186 RSA
- FIPS 197 AES

Ethernet

- RFC 894 Ethernet II Encapsulation
- IEEE 802.1D MAC Bridges
- IEEE 802.1G Remote MAC Bridging

AT-AR415S | Secure Modular Router

About Allied Telesis

Allied Telesis is part of the Allied Telesis Group. Founded in 1987, the company is a global provider of secure Ethernet/IP access solutions and an industry leader in the deployment of IP Triple Play networks over copper and fiber access infrastructure. Our POTS-to-10G iMAP integrated Multiservice Access Platform and iMG intelligent Multiservice Gateways, in conjunction with advanced switching, routing and WDM-based transport solutions, enable public and private network operators and service providers of all sizes to deploy scalable, carrier-grade networks for the cost-effective delivery of packet-based voice, video and data services. Visit us online at www.alliedtelesis.com.

Service and Support

Allied Telesis provides value-added support services for its customers under its Net.Cover programs. For more information on Net.Cover support programs available in your area, contact your Allied Telesis sales representative or visit our website: www.alliedtelesis.com
